**INQUIRY INTO USE OF CANNABIS FOR MEDICAL
PURPOSES**

Name: Mr Roger Seccombe

Date received: 23/01/2013

Cannabis should be legally available for medical use!

To not allow cannabis to be used medically in this, the 21st Century, is an indication of how little regard the government has for the health of its citizens.

It shows how little regard the government has for the 'pain and suffering' of many of our people.

The medical benefits of cannabis are well documented overseas.

The excuses used to deny its medical use are, to say the least, pathetic. And they are 'excuses', not (valid) reasons.

Please recommend that the medical use of cannabis be legislated, urgently.

Yours faithfully,
Roger Seccombe
