**INQUIRY INTO PLANNING PROCESS IN NEWCASTLE
AND THE BROADER HUNTER REGION**

Name: Mr Bhadro McDonald

Date received: 21/10/2014

Decisions made by people who have proved corrupt should not have any impact on the planning of Newcastle. This unique city, second to develop after Sydney should have an important place in our history and be preserved by limiting high rise development. I beg you to listen to the residents of Newcastle and prevent development that will benefit the rich and deprive us of our city's long legacy. Do not remove public lands and place them in the hands of developers. Do not remove our rail line-a trip past Newcastle rail station will show how many people from the upper Hunter Valley use it, how many youngsters from outer suburbs use this station. there is no logic behind its removal other than the logic of corrupt developers who wish to use the corridor of land for their own purposes. thanks

Bhadro McDonald
