INQUIRY INTO COAL SEAM GAS

Name: Name suppressed

Date received: 31/08/2011

Partially Confidential

I am absolutely horrified at what is happening with the Coal seam gas mining industry . I am aware of the effects it has had on other countries and I cannot believe we are letting this happen here in Australia . All for the dollar .. We cannot see this now ,, and it is clear that no one is really thinking about anything but the money here .. But it is obviously very dangerous to the lives of us as a race ..In time this will be nothing but a shameless wasting ... gas pipes laying everywhere... and undrinkable water for our people and our animals ..I have seen footage of this ... In the U.S ... many cows laying dead because the water that has been attached to the gas mining industry has leaked out ...We KNOW that it is making people sick and killing animals in other countries , and people I am sure .

I know this is probably not a submission like all others with big words etc ,, but this plea comes from my heart.. I have a child . I am sure you may do too . We need to think of the generations that walk behind us here .We live in a most beautiful country and I feel so blessed to be here .When I see or hear that coal seam gas mining is getting closer and bigger I feel physically ill at the thought .This is a HUGE mistake .We know it .We must not let this happen to our beautiful country
