## **INQUIRY INTO SAME SEX MARRIAGE LAW IN NSW**

**Name:** Mrs Leisha Stevens

**Date received:** 15/02/2013

---

The Marriage Act should not be changed  
IT IS NOT A DISCRIMINATORY THING BUT A BLOOD LINE THING!

Marriage is between a woman and a man, and the begetting of children (biological children). MOST COUPLES intend on having children at some stage of their married life.

Even though parents that adopt are very generous in helping out with a situation that left a child with no parents, to create this situation (which same sex couples have to do by borrowing sperms/ovaries/wombs), is not an ideal to be sought after, as we all know the psychological torment of children/adults that crave to know their past history of their ancestors and will go to any length to find their REAL mother and father. Human beings need more than food, water, education, love and protection, they need a blood line to help them know who they are.

If family was not so important, why do we spend most of our life trying to find out who we are, especially when we get older? There are many a people that spend their retirement looking up their family tree. So I ask you again, is not biological family ancestry important?

Please say no to homosexual marriage.

This is not a discriminatory thing it is a BLOOD LINE THING (humans want to know where they come from AND HAVE CONTACT with their blood line relatives so they can work out who they are and why they are a certain way).

warm regards

Leisha
