Inquiry into the Building the Education Revolution

I am writing on behalf of the Rous Public School P&C Committee, referring to the promised Federal Stimulus Package.

*The School comprising of 78 students, was promised one demountable building with a floating dividable wall to form two classrooms. In addition, Air Conditioning units were also allocated to these rooms when our two **AIR CONDITIONED** demountables were removed.*

*We currently have a building that is sitting dormant with a **Fixed Central Wall** and the same building **without Air Conditioning units** to these rooms.*

Without air conditioning units, there is no way our students will be able to utilise these rooms due to safety and discomfort which will stop them from learning as they have in the past.

*We have just discovered that the **promised Air Conditioning and Movable Wall will not be put in place**. We have also been informed that our project was coming in under budget, yet these promises have been broken.*

To purchase and install these Air Conditioning units will place a huge burden on our very devoted parents of the students and to raise this type of money may take many years. As our Air Conditioned rooms have been taken away it seems only fair to replace them with Air Conditioned ones. The Air Conditioning and movable wall were promised repeatedly from the very beginning of the project at all levels of administration and implementation.

Regards

Scott Leslie
P&C President
