Comments to the Parliamentary Committee:

I am appalled to learn about the massive overbreeding of greyhounds, the widespread doping of dogs with illegal drugs, and the admitted killing of 3,000 ex-racers each year. At a minimum, an independent regulatory body must be created, mandatory adoption programs put in place, and a moratorium placed on any new dog tracks. Social Media is keeping track of this cruelty and disregard for these gentle dogs and Australia will definitely lose tourism over this important issue to all animal lovers around the world. Please do something to STOP this madness.
