## FORMER URANIUM SMELTER SITE, HUNTER'S HILL

**Name:** Mr Gerardus van Nunen

**Date received:** 26/06/2008

---

We are living in 19 Prince Edward Parade in Hunters Hill. We are a young family with children age 4, 3 and an infant. 19, Prince Edward Parade is right behind Nelsons Parade 11. We are particularly alarmed by yesterday's article on the radiation levels at Nelsons Parade in Hunters Hill. These levels are extraordinary high and we have genuine concern that our premises may be affected by it.

Therefore we request for a radiation measurement at our premises to determine the level of radiation.

Kind regards,  
Geert van Nunen

PS We have a couple of trees in our and our neighbour's gardens that had large parts that were totally without leaves in spring and summer.
