Dear Sir,

I am writing in support to the submission made to your committee by the MTA of NSW.

That submission argues that Industry Workers Comp Funds will significantly reduce the deficit mainly through better management and by it having the resources to ensure that each workplace is safe and thus reducing the number of accidents. MTA had already proven that it has the ability and capacity to do this. Managing and industry fund would increase its ability to do this and its improved management and workplace safety would reduce the deficit without diluting the rights of individual workers.

Yours Sincerely

Joseph Zammit
