You are just like John Howard, selling public assets don't care about what the public wants or what we think, you all just don't care. I have voted labor all my life I'm 46 this year, you all just don't give a dam. Go private people will lose there jobs. As most people know when you privatise things people lose there jobs. As you know this is true, so I will never vote for labor again, because you just don't care about anything, you only care about is yourselves.
