Summary

INTENDED US OF FUNDS RAISED..

I strongly believe the proceeds from the Snowy Sale should be used for water and power projects only.

Suggest a ratio of 70/30.

With many storages holding very minimum quantities at present any means of retaining/securing water would be beneficial, which means more long term funding is required to achieve this.

The percentage for power could be used to investigate better/new technology for Waste Systems, either for our current power supply or nuclear.

Yours sincerely

Dot Hammond
