INQUIRY INTO COAL SEAM GAS

Name: Ms Roselyn Druce

Date received: 14/09/2011

I object to the continuation of the Coal Seam Gas exploration in the "Pilliga" Forest under PEL 238. This area has been declared an IBA and is home to many Vulnerable and endangered Bird and Wildlife species. Fragmentation and destruction of these Habitats are being reduced state wide and causing the decline in our Native Bird life, Flora and other endangered Fauna! Please consider the Environment before Economics, We must consider the long term destruction that this will cause.
