Partially Confidential

I do not support same sex marriage as my belief tells me that our God created human with man and woman. We are coming together to form a family and have our offspring. If we choose to have same sex marriage, how on earth could we have our offspring? In a long run, our country will not have population growth.

We certainly cannot stop people who choose to have a same sex relationship but we cannot tolerate or recognise their marriage, as this does not match my belief.
