## **INQUIRY INTO COAL SEAM GAS**

**Name:** Greg Armfield

**Date received:** 4/09/2011

---

There needs to be a moratorium on Coal Seam Gas extraction because there is way too much at stake. Our waterways, our farmlands, our towns and our environment must be protected at all costs. It will be too late when dangerous chemicals have entered our water supply. What will the future generations think of us when their water is unusable? We need to take a step back and consider this subject very carefully.
