Please stop this catastrophe from happening! It has a huge long-term potential to destroy our land, our water, our air, our health and the value of our homes. Mining does not have the social license to destroy our valley or our planet!

Why is Australia selling its Soul to the highest bidder? Have you considered what will happen to the health system if more and more people are poisoned by this process - if you have an epidemic of cancer.....if there are no people left alive to pay your taxes and salaries.

It could be one of your own family members poisoned one day - don't let it go that far - PLEASE!
