INQUIRY INTO GREYHOUND RACING IN NSW

Name: Name suppressed

Date received: 16/10/2013

Partially Confidential

The greyhound industry should be receiving it's fair share of the tricode monies, as the industry is struggling financially on the percentage it is currently receiving. Prizemoney levels are below the equivalent received in Victoria, and from what I understand current levels will not be sustainable for much longer. Some tracks have already closed and without more money I believe there will be more closures, which is not good for the industry. If the correct percentage was received there would be more scope to implement a better industry Adoption Program, as I feel the GRNSW program needs to be totally revamped to achieve better adoption rates, and more money would be available to promote greyhounds as pets post racing.
