Date Received: 19/08/2005

Subject:

Summary

19 AUG 2005

We are opposed to the following construction of your highway because of Noise issues that will directly affect the enviornmental surroundings of our neighborhood. The six lane highway will not only impact us on an aesthetic level but will seriously affect our wildlife and natural vegetation of this beautiful area. Toursim is our life blood, we support bringing tourists to the Bay Area but only under public review and input(this includes the people that live in the area in which this will directly affect). Please listen to your community input before implementing such a final decision.
