**Summary**

The current terms of reference for an inquiry into corrective services needs to be broadened to include issues related to the incarcerated (human beings) 95% of whom do not need to be caged like animals and fed methadone whether or not they are pregnant. As long as the inmate is incarcerated she is fed methadone which rots her teeth and does untold harm to her body including her unborn baby. The availability of methadone causes all sorts of sub-human behaviour among inmates and officers.
