## **INQUIRY INTO COAL SEAM GAS**

**Name:** Mr Trent Bailey

**Date received:** 29/08/2011

---

To whom this may concern (all of us), It is common knowledge that Coal Seam Gas exploration has the potential to pollute our water ways, both underground and above ground. No company can give us a 100% guarantee that they won't pollute our water ways. Money is their focus, they want to come into our backyards and simply make money then leave. Germany has said NO to CSG so should Australia.....

Regards
