

INQUIRY INTO SAME SEX MARRIAGE LAW IN NSW

Name: Mr Gwilym Smart

Date received: 9/02/2013

Since the world was created all creatures were developed as male and female for procreation and protection of the species. the male and female to some extent are involved in the development and protection of their young. History has shown where this does not occur the species is decimated. Marriage was developed for the same reason, procreation and protection of the family unit. Family being male & female and children. Same sex marriage does not satisfy any of the above criteria. The problem of same sex being affiliated with each other has been with us since time begun, same sex relationships and marriage has not and will not resolve anything. Whilst respecting these people who are different, some who have been my friends and colleagues. I see no benefit legally, financially, or morally to same sex marriage. Therefor I'm against same sex marriage for what appears to be 'we are the same as you' ism, unfortunately they are not and all powers in this world will not change that.
