

INQUIRY INTO GENTRADER TRANSACTIONS

Name: Mr John Butcher

Date received: 14/01/2011

I wish to state publicly my total opposition to the sell-off of the State's energy resources. The privatisation of public assets is contrary to the best interests of average citizens and only serves the interests of the big end of town and it is a disgrace that this is being done by a Labor government.

The privatisation will increase prices, result in job losses and also put into private pockets profits which should go to all taxpayers.

The lack of transparency in the process is also a major concern.
