Marriage is a contract between a man and a woman. Two women or two men do not constitute marriage contract and have to go outside marriage to either adopt or have procedures undertaken to have children. For thousands of years our dumb forbears recognised this fact but we now our greedy unprincipled politicians in this enlightened age will do anything to get a vote. Gays of both persuasions want all the conditions of marriage to include sperm donors, IVF when needed and they right to adopt yet the risk to children brought up in such surroundings must be at greater than children raised in conventional surroundings of a heterosexual married couple.
