Re the subject of same-sex marriage legislation in the NSW Parliament. Isn't this an issue for Federal Government? Also why break away from a family function that has existed and held family together from ancient past? My main worry though would be seeing the breakdown of a healthy, balanced family as it affects our future generations of children. I see NO BALANCE and NO WISDOM in this sort of effort. Don't try to change something that is not broken and doesn't need fixing. Gay couples enjoy legitimacy so why pretend marriage can be between the same sex. It even goes against nature. It certainly isn't what God originally designed!
