INQUIRY INTO DRUG AND ALCOHOL TREATMENT

Organisation: Australian Medical Association (NSW)

Date received: 8/03/2013

Further to the NSW Australian Medical Association's previous submission #8, we would like to make the additional comment that the General Purpose Standing Committee No. 2 is recommended to also note the specific needs of at-risk groups, particularly within indigenous communities, the justice system and correctional facilities.

The Committee is also encouraged to identify and explore opportunities to provide alcohol and other drug treatment services and education to groups within tertiary education, such as students.
