**INQUIRY INTO MANAGEMENT OF PUBLIC LAND IN
NEW SOUTH WALES**

Name: Name suppressed
Date received: 3/08/2012

Partially Confidential

In my opinion, public land management and access should essentially not be changed and should be guided by scientific evidence. Amateur shooting, horseriding, domestic animals, grazing, mining or logging should not be allowed in National Parks. Feral animal control, weed control, fire hazard reduction should all be stepped up using professionals and resources for management increased accordingly. The needs of disabled access should be accommodated where they do not compromise biodiversity.
