

INQUIRY INTO SAME SEX MARRIAGE LAW IN NSW

Name: Mrs Pam Small

Date received: 15/02/2013

I wish to make a submission to oppose calling a 'same-sex' relationship marriage. 'Same-sex couples' already have rights and privileges. They may want to call it 'marriage' but it is not nor can ever be true marriage. Marriage is physically obvious to be between a man and a woman. Two of the same sex can NEVER relate in the same way as a man and woman because of the design of their bodies. They can never 'naturally' produce offspring. Statistics show that males and females contribute their own unique characteristics to a marriage and family life. A father (male) and mother (female) offer a complementary role to the parenting of a child that cannot be duplicated by any other relationship. Governments should be putting their time and energy, etc. into supporting the roles of males and females in marriages. I can't believe that people with intelligence can't see what is strikingly obvious!! Politicians, don't be misled into believing something that could ultimately be the downfall of our society and our great nation.
