

INQUIRY INTO NSW WORKERS COMPENSATION SCHEME

Name: Name suppressed
Date received: 15/05/2012

Partially Confidential

If Workers Comp premiums increase at the reported percentage of 28% this would increase our Companies overheads and take away from profits around the \$15,000.00 PA. to our company, this would cause major issues with the company already struggling with profit. Along with the NSW premiums already 20 to 60% higher than Vic and Qld how can the NSW companies compete against the neighbouring states. If apples are apples with Works Comp between states NSW companies will close their doors and put huge amopunt of people on the un-employment lines. Business is hard enough at the moment without the State Government causing more heart ache to small business.
