## **INQUIRY INTO COAL SEAM GAS**

**Name:** Ms Mary Smith

**Date received:** 8/09/2011

---

There is precedent experience of these methods and their effects. It is well documented. Noone can say they do not know. It is not safe. It has dire effects. How can anyone in conscience say otherwise. Concoct / research another way to do it that does not DESTROY and we can all survive. Its not just a bunch of greenies saying no to big money. Its ALL of us saying we love our country and want it to sustain us a bit longer than tomorrow.
