## **INQUIRY INTO COAL SEAM GAS**

**Name:** Miss Renae Moore

**Date received:** 13/09/2011

---

I, Renae Amber Moore am heavily opposed to the Camden Gas Project. AGL publicly states that Campbelltown and Camden residents are in favour of this project. AGL has no right to take away my sovereignty and speak on my behalf in 'favour' of this project. I am not in favour of this project. What person would be in favour of ill health and a destroyed environment? What citizen of our region would possibly benefit from this project? Is it not my right as a human being to be free from harm?

In the words of Ulrich Beck, "Humanity has never before had to live so much under the threat of self-annihilation. Never before have entire oceans been threatened with poisoning. Never before have entire animal species disappeared from the face of the earth, almost overnight, through greed or carelessness".

Social and Environmental Accounting is apparently not one of AGL's concerns. To value the health of citizens, wildlife and the environment is not a practice that creates profits.

Since when did the basis of our existence come down to monetary terms?
