Dear Director

I refer to the Committee's invitation for submissions on issues relevant to tobacco smoking in New South Wales.

With respect, I believe the issues identified in the Committee's advertisement miss the point.

The central issue is the proven fact that smoking causes a range of health problems, up to and including death. It has no countervailing benefits.

The Committee should serve the public interest by recommending that the possession and use of tobacco products be banned in New South Wales.

Yours faithfully

Stephen Brown.

(MR. STEPHEN BROWN)
