INQUIRY INTO SAME SEX MARRIAGE LAW IN NSW

Name: Mr Philip Brown

Date received: 11/02/2013

I believe history itself reflect the importance of the sanctity of marriage being between a male and female where children are procreated in the ideal environment of having a mum and dad. Already we see the huge consequences of family breakdown and this will only further erode this vital building block of society.

This is such an important issue it should not be decided by States pressured by minority groups but decided by a referendum involving the whole populace.

I also take exception to propaganda that is already entering State schools and other institutions in the name of tolerance and anti discrimination when in reality it is promoting a lifestyle and views I believe the majority do not condone. Our laws already give great freedom and protection to individuals so many of the arguments touted are invalid.
