

INQUIRY INTO GREYHOUND RACING IN NSW

Name: Miss Vicki Birch

Date received: 15/10/2013

Something must be done about the treatment of the greyhound. Racing in 36 degree heat and left for dead, being administered drugs by ruthless money hungry owners, killing of thousands of unwanted dogs. These actions are not acceptable. We are not a third world country and should be able to have legislative standards/conditions and big penalties imposed on those who have no regard for an animals life and wellbeing it is just disgusting. Please do something positive and stop all this inhumane treatment. Remember canines help us humans in many ways such as drugs detection, illegal food detection, explosive detection, aid the blind and hearing impaired, trained and used in the police force fighting crime, finding bodies in disasters and companions to millions the world over. Don't you think they deserve better from the human race and the powers that be??????
