Dear Sir / Madam.

I'm concerned for the very
little blood of the local area. Please do something
about it.

Trained persons can't be found to move to
regional areas. A website should be
established free or cheap to enter young
professionals to the regional areas.

Some professions can't be filled readily
especially Doctors, Dentists, nurses,
motor mechanics, welders, boilermakers,
truck drivers + clerks, + Building Bricklayers etc.
If young people can't be enticed to move
from the city to fill these positions I
suggest you look overseas especially in the
UK + South Africa, Kenya, Sudan +
Arab Countries.

I'm involved with a Church International
Group called African International.

I know First Aid Trainers who
could fill these positions especially
motor mechanics + Building trades workers.
Are in our supply in some of the
above countries + I suggest you look at
relaxing some of the conditions to get them
here in order to fill the regional positions
here on the coast + inland.

100
employers here cant get enough
good labour skilled labour +
professional such as motor mechanics
so businesses suffer + cant expand
because they cant find the staff to do so.
Same with the health system.

I urge you all to get on your
bults + do something about the
problem.

there are many solutions + some
are already suggested.

men with strangle + set in 10
years not being able to go ahead.

OLD + VICTORIA are attracting
professionals why cant NSW.

Ill tell you why you wont get off your
bums + see the country TRUST HANDS +
see what we need, tour NSW + see for
yourselves then you know why + be able to help

Yours Sincerely
Dunham
