INQUIRY INTO COAL SEAM GAS

Name: Name suppressed
Date received: 7/09/2011

Partially Confidential

Coal seam gas mining by fracking is a very greedy and destructive way to produce energy. We, the people of NSW, demand that the NSW Government look after our interests and not allow fracking into NSW farmlands or otherwise. My family (and many other thousands of families) depend on bore water for our total water supply, and NOBODY can guarantee that our water table will not be destroyed by the dangerous chemicals that the mining companies will inject into our lands. Energy companies have destroyed a lot of American farmlands and their waterways. Lets learn from their mistakes and BAN fracking in NSW. We should be looking at alternative energy such as solar. Why doesn't the NSW Govt wish to give a grant to "TechniqueSolar"why are we supporting a nonsense such as "green coal"? The Government has a duty to look after its people... not allow them to be poisoned or the farmlands to be raped by a few non caring, lying energy companies. I ASK THE NSW GOVERNMENT TO DO ITS JOB.....AND BAN FRACKING.
