INQUIRY INTO RURAL WIND FARMS

Name: Mr Jamie Buck

Date received: 10/08/2009

While I realise that it is acceptable to scar the landscape with high rise buildings in the city, I do not think it is so in the bush.

I invite members to go to the top of Pejar Hill on Crookwell Road near Goulburn in the day and Night time.

This used to be a pristine environment with beautiful views as far as the eye could see.

Now you can see 2 windfarms and this will soon increase to 4. They are a blight on the landscape and cost the consumer both in the environment and the hip pocket. At night there are dozens of glaring red lights.

To make matters worse their very location makes the sight more prominent as they will soon take up every hillside.
