Summary

The Snowy scheme is an Aussie icon , and directly effects the lives of all people from the Snowy Mountains to the sea in South Aust. Nobody knows what will happen if it is sold,regardless of what deals are done when the sale is finalised.

Therefore the proposed sale is playing with the lives of millions of Australians.

No buyer will enter a contract which has a 'hold, no action to change water allocations unless the buyer can see how they can earn more from it. Therefore everyone in the area effected by the Snowy scheme will not wish to see a sale take place.
