INQUIRY INTO COAL SEAM GAS

Name: Ms Jennifer Bailey

Date received: 5/09/2011

Dear Sir/Madam, as an ordinary working class citizen, and having just one voice, I feel powerless, and extremely saddened that if Coal Seam Gas production proceeds without further scientific research into it's likely impact on our already fragile environment, we may as well be playing Russian Roulette. You have the power to protect us, our water, our landscape and our environment and I beg of you to do everything in that power to ensure that profit and Coal Seam Gas Production does not destroy our rural communities and what lies beneath them.

Yours Faithfully
Jennifer Bailey
