## INQUIRY INTO USE OF CANNABIS FOR MEDICAL PURPOSES

**Name:** Name Suppressed

**Date received:** 24/12/2012

---

Partially Confidential

I have been diagnosed with a grade 4 glioblastoma, the chemo that I take tends to make me feel nauseous most of the day, and the medication that is available to combat this, has little effect, but makes me constipated. The result is that most of the day I suffer from both nausea and the constipation adds greatly to my discomfort. If cannabis was legalized or at least tolerated for people with my condition, it would enhance the quality of our last days. My illness prevents me from driving, and the long term health effects of cannabis matter little to people like me, because my prognosis is at best a few years survival if I am lucky.
