**INQUIRY INTO ECONOMIC AND SOCIAL DEVELOPMENT
IN CENTRAL WESTERN NEW SOUTH WALES**

Name: Ms Julie Head

Date received: 7/10/2011

The Director,
Standing Committee of State Development
Parliament House
Macquarie St
Sydney NSW 2000

Submission for decline in economic, social and population growth in Central West NSW.

The biggest reason for decline in economic and social growth and population growth in Central West NSW is the State and Commonwealth governments anti-Australian Marxist policies and commitment to the International Bankers 'Globalisation' program which is called New World Order under United Nations. (See United Nations websites about global governance)

Globalisation or World Government-sell out of Australia.

What is Globalisation and how does it affect people in the bush or Central West NSW?

Globalisation is the integrating economically and socially and politically of all nations into a mix of all cultures and all overseas products into regions with appointed councils under a World Government Bob Brown recently stated as one of his Greens policies. Which means Australia will lose its sovereignty and independence. Decisions are no longer made in the Parliaments but in boardrooms overseas to benefit foreign corporations not Australian interests but foreign corporations and multinationals that do not pay taxes and regulate themselves. This has come from a perverted system of government with bought and paid politicians from international bankers who have trashed our Constitutions both state and federal and destroyed the lifeblood of farming which has gone from 300,000 farmers to less than 40,000 and small businesses disappearing and Australia being turned into a welfare state as

governments entice and encourage people to get on welfare as a panacea.

From Experience and research

I am a fifth generation that has lived in Narromine in the Central West of NSW most of my life My husband and I reared a family, had a hobby farm and a successful business and a lot of real estate there so I am speaking from experience and also from an independent researcher's point of view who has been researching for last 4 years about why our country has been destroyed and why we have lost our rights and the country is being turned into a third world country.

The cancer that choked Narromine is the same story in all country towns and other countries is when governments collude with big business, and act in their best interests for foreign corporations instead of protecting and representing Australian's interests. Another name for this is treason or treachery which is a crime as the Crimes Act 1914 24AA but because anti-Australian politicians are the 'protected species' in Australia no politician is ever prosecuted so the country is being sold out and Australians are being robbed of their rights, heritage and family farms. As the bush has been the hardest hit by globalisation which I will go into more detail later on.

Case Study Narromine Central West

Narromine was a prosperous thriving town known for its oranges, wheat, fresh orange juice, roses, wheat/sheep/citrus/vegetable/wool, dried tomatoes, stone fruit, cotton, that was economically and socially sound to become an area where services are cut, crime is out of control and the worst in NSW and farmers were driven off the land in droves from government policies and this is the life blood of country and communities. And many businesses have closed down because they were driven out by big business or bought out by big business at fire sale prices. For eg the local supermarket couldn't compete with Bi-Lo and put a three generation

business out of business and had to sell as well as Dubbo multinationals arrived being 25 miles away sucked our town dry. The local Farm Produce Store sold out to Ag and Vet and the local fuel companies had to compete with multinationals. The same with pubs and clubs that closed down and went backwards when liquor was sold in supermarkets. The Commonwealth and West Pac and Rural Banks closed down when Paul Keating let in the International Banks to centralise and deregulate banks. General Motors closed down as they were bought out, Coles arrived and the town lost a lot of businesses in the town as they sold everything to anything. When the Multinational comes in they have the goal of sending their little competitors broke as they told us by under cutting bread prices. When businesses close down jobs and skills are lost and so is the uniqueness of the town. The country towns are dying and children have to go to the city for work and University so families pack up and move to the city like we did.

Although they have built a uni at Dubbo and many other places in the country the governments now has been bringing in 500.000(ABC) mainly Asian students to fulfil the making of Pacific Asian Union Kevin Rudd has been promoting the third bloc of the World Government of turning Australia into an Asian country. Another act of treason -(Graeme Campbell MP Asianation of Australia) The Australian kids miss out again as Government favours Asians as part of the globalisation plan to place Asians in top positions which can be read in Peter Wilkinson 's book – *The Howard Legacy about the displacement of traditional Australia from the professional and managerial classes*. So one third of foreigners stay on which takes Australian kids jobs. It won't belong before they reach their goal of more Asians than Australians. Also a document requested for the Prime Minister in confidence *Strengthening Australia position in the New World Order* goes into more detail drawn up by a Multinationals and bringing in more Chinese and Asians at the expense of Australians. (can be accessed on internet)

I will outline how Globalisation or New World Order policies and Free Trade Agreements implemented by foreign controlled State and Federal governments and politicians have destroyed Australian industries, farms, employment, towns and our future as a prosperous country. (Linda Weiss and Co book *How to kill a Country* go into more detail about Free Trade Agreements signed. The program has affected the Central West NSW which is similar right around Australia as outlined in *Globalisation The demise of Australian Nation* by Graham Strachan's book.

Anti-Australian Govt. Policies that destroyed Central West NSW

1. Gough Whitlam signed the Lima Declaration Act in 1975 in Peru which was to wind back our industries and send them overseas to third world countries then buy back the products to help third world. For example when I was setting up a Bed and breakfast I couldn't find any where in Australia that makes cotton sheets and woollen products but could buy from a Chinese company that claims to be Australian. Our industries have been given to third world countries to make them rich and us poor as part of their equalising or Marxism.

2. GATT (General Agreement Trade and Tariff) or unelected World Trade Organisation dictators that dictate world trade internationally that has caused gluts of products and scarcity and caused all countries exporting products to be in debt and total destruction. General trade and tariff removing tariff off products and bringing in cheaper imports, I watched farmers plough in orange and fruit trees as cheaper inferior products put them out of business. Narromine had the best fresh juice in Australia that employed 100's and the Brazilian cheaper juices sold in supermarkets put them out of business. The government blamed it on global warming. Even today beautiful oranges fall on the ground and are not picked because farmers have been robbed of

selling their fruit at fair prices as more and more cheap imports come in from third world countries which are nowhere in the class of Australian oranges because tariffs were removed. Totally disgusting political treason.

3. Sell off of Commonwealth Bank - letting in international banks that were meant to make interest and bank rates cheaper but interest rates went up to 18% and sent many farms and businesses broke. The Banks also foreclosed the credit on country people. I worked for Stock and Station agents who have all closed down now and was at the auctions where fourth generations farms were sold off because of high interest rates and farmers were told to get big or get out and meet their quota system. When they tried to get big by going into debt tariffs were removed and couldn't sell produce and pay back high interests.

4. Sell off of State and Rural banks- money was used for loans to locals and provided jobs and loans to businesses.

5. Privatisation or sell off of water electricity, communications, water to pay for debt that governments racked up. Foreign corporations bought electricity and Telstra and cut staff and brought in Indians or Asians for jobs. Aussies lost jobs and apprenticeships, prices went up for water and electricity another added cost.

6. Government favouring Monopolies Woolies, Coles, Dan Murphies, McDonalds, Kentucky etc has driven small food shops out of business. These monopolies cut jobs then bringing in self service - more jobs lost.

7. Selling off Australia Petroleum cos and allowing service station monopolies such as Caltex to flourish- they cut back services and jobs and drive small businesses out of business although they gave better service and price.

8. Govt high unnecessary debt to foreign bankers-Govt sells off everything it gets his hands on to pay international bankers back and we become a banana republic and are taxed heavily to repay debts.

9. Council squandering money on share markets and rates go up to make up for it and services are cut because they can't afford it. More jobs lost and training.

10. State imposed rules and regulations bureaucracy for building and applications that drain finances and stifle strangle small business.

11. Council became Corporations money making instead of providing services for the people who own the council such as taxpayers.

12. GST business had added expense of computers and work load and become tax collectors for international bankers to pay back the debt IMF introduced GST. Many of us put off staff to cut costs.

13. Superannuation was introduced by Fabian Paul Keating that started at 3% - 9% which was a drain on small business and many put staff off so didn't have to pay it or organised casual labour to avoid paying it. Rest a government organisation was responsible for it and could never find it or the super was eaten away by fees or govt charges.

14. Woollies and Coles came to small country towns or close by have been the biggest drain were octopus drain the towns and businesses close and empty shops are left. They put off staff and are favoured by governments with different pay rates and now put in self service which cuts jobs and take away skilled jobs for youth. The Government extended the business hours for the Multinationals and sent all the corner store shops broke.

15. Cotton and Chemical Dictatorship – drains and rapes country areas with the high usage of chemicals sometimes 20 times more chemical and 10 times as much water, Before we left Narromine the farmers and myself had to sink our bores deeper as it appeared the water table was falling although we are told the it is rising. The water appeared to be running out and many farmers blamed the cotton corporations and Cubby Station biggest user of water as cotton uses more cotton than any other crops. With the high use of chemicals comes cancer rates and degradation of the environment is a result of cotton and farmers are forced into growing the profitable crops and then have to borrow large sums from banks which is good for the bankers as some go broke and have to move to the city.

16. Lack of services- Foreign controlled governments like Australia cut back essential services like policeman, nurses, doctors and hospitals because they have sold all the revenue raising utilities that taxpayers owned like Lotteries, Electricity, Banks, Wheat Boards, etc so profits are no longer there as another country owns them The government does not have any income coming in from them other than taxes. So Police Stations and hospitals are closed down which gave jobs and skills to many young people in hospitals and quality of life to Australians but when a government doesn't represent Australia they don't care about the people.

17. Un-Australian Governments do not support or buy Australian products but support and buy foreign products. Councils didn't support local industry but would support a multinational or out of town eg, recycling. The aborigines ran the recycling at the tip and did a good job but council decided to support out of town which left many aboriginals unemployed which causes increase in crime. I have a heritage house that has been trashed and destroyed from young kids. The law and Police say there is nothing they can do about it. Another Marxist theory is no law and order.

18. Land Council Money- Governments handed out massive amounts of hard earned taxpayers money to Aboriginals which was unaccountable and much of it appeared to be wasted as they could do what they like. In Narromine many who were in control had big new cars and overseas trips and they built buildings on land for farms as offices and were extravagant. They grew vegetables and all of a sudden were closed down. When government decided to stop the funds. This hasn't helped the aboriginals with jobs or skills.

19. Controlled Communist Media, in the bush you do not have a choice like the city. The media is controlled people are not being told the truth but propaganda and cannot have their say and are crucified by the media. For example when we were campaigning against cotton chemicals and trees being cut down the media crucifies the little person and goes with sponsors and owners of media. The media pushes their globalisation agenda onto the public. Most country people are left in the dark about the state of their country.

20. Transport system trains and services were cut and railway tracks are not the busy places they once were. They used to bring goods and products to towns and had a railway master and lots of staff for passengers. There s no staff now like all railways as jobs were cut and railways closed down.

21. Government and councils fake environmental policies implemented by govt advisors to sell their products and gain more power. Such as cutting down hundreds of trees in Narromine town ship was planned Was it to put in Rockefellers Genetically Modified trees that do not reproduce? Spraying chemicals recklessly that are not regulated but a law unto themselves. Many were allowed to spray houses and people , school busses with chemical and not blink an eye. Most healthy people do not want to stay in rural areas that are chemical centres where cancer , asthma rates, sickness increase and leave like we did.

22. Deregulation of the bread, milk, vegetable and all industries which meant the Coles and Woollies could come in sell fruit and veges, milk, meat , bread cheaper and send the little bloke broke. Which is why it is hard to find bread and fruit shops in many towns.

23. The Federal Government then helped and enticed overseas buyers come in and buy up our businesses. Mainly Asian to fit in with the Asian agenda for the new Australasia. Although Asians can't speak English that is o.K. as long as they buy out the Aussies. This is what happened to our business the Japanese bought us out, He couldn't speak English.

24. The racist Government then decided to clean up the streets in Sydney and decided to move the aboriginals out to smaller towns in CWNSW and subsidise their houses while we had to pay for ours. The crime increased and when our shops were broken into several times by aboriginals they were never charged. They also bought in another law for aboriginals but most aboriginals want to be treated the same as every one else and earn a home and have employment and learn skills like every one else. So crime has increased and is out of hand as no-one is charges or held accountable.

24. Water licenses were taken and bought by the Government Marxist dictators and sold to US corporations so farmers couldn't water their crops. I saw this first hand and beautiful stone fruit were pulled out. by farmers because they didn't have water.

25. After their policies sent many farmers, businesses broke government offered welfare for their dream of their socialist state and World Government

26. Money for single mums to have children, we saw the increase of young girls having babies for money and being on

welfare which is also part of socialism. I rented many houses to them many were into drugs and neglecting their kids with welfare money and wouldn't pay their rent as they knew they could get away with it. They could stay until it took 3 months to go to court to get them out. The Marxist laws favour the welfare and criminalise hard workers and Land lords like myself. Government handing out massive amounts of welfare encourage a society that becomes lazy and doesn't need a father for their children.

Recommendations-

The Fish Stinks from the head down the problem has been at the top of Parliament from Commonwealth and State Parliaments dictatorships.

Politicians have to held accountable to the public and the only way is to ban political donations of all sorts Zero tolerance to corruption. Prosecution in Public trials for treason have already been instigated by many citizens and assets must be confiscated and politicians jailed for corruption and that will stop it. Australians can no longer tolerate a corrupt government that is deliberately destroying our country and have a hate for Australia and Australians.

1. Politicians must be born in Australia to be in Parliament as we have seen with many especially Kristina Keenly who have been brought in from other countries who just happen to fall in the top position in Parliament and betray Australians by selling off electricity, approving coal seam gas mining and many more New World Order policies. Then dictate to the everyone and will not answer any questions which is totally unacceptable for a public official. Such arrogance will not be tolerated and must be prosecuted.

2. Politicians must respect and obey the NSW Constitution and if not get out of Parliament.

3. Politicians who have committed to New World Order must be tossed out and prosecuted as this is political treason. The New World Order policies must be reversed.

4. Tariffs must be put back on products to protect our farmers and industries.

5. Build our industries up again and get railways going for goods and services.

6. Stop foreigners buying up all the land and stop government helping them to come in do so.

7. To stimulate economy abolish land tax and others and states take back collecting taxes.

8. Fed Government dictatorship must be decentralised and go back to dealing with only national issues and butt out of state business like health, education, environment. The Federal government could even be abolished as they have been the trouble colluding with international bankers.

9. Education and health, environment must be handled by states and manage the their own money.

10. Set up Australian State, Commonwealth and Rural Banks that belong to the people like before under the Constitution they have the power to provide money and lend money at cheap rates to get businesses and farms going again.

11. Government must give back farms they have stolen back from farmers under fake environmental laws.

12. Stop the false carbon tax and environment rules and regulations and replace with proper environmental reforms, such as rainwater tanks, recycling done by the local

unemployed youth, planting of trees, ban GM crops and encourage organic farming.

13. Give Councils back their power to serve the communities by allowing them to run their electricity water, recycling and offer apprenticeships and have more control over the money. Councils used to run and manage the utilities and were more efficient than big corporations as we had cheap water and electricity.

14. Stop subsidising aboriginal housing in areas to create racism and increase crime rates as part of the globalisation policies. Give aboriginals real jobs and treat them the same as everyone else instead of exploiting them for political reasons to take peoples land away from them.(see Red over Black by Geoff McDonald)

15. Councils support and buy from local businesses.

16. Tax multinationals 60% like Japan and other countries do and lower our taxes to stimulate the economy and drive big business out of Australia.

18. Repeal many of the laws that destroy businesses and regulations and liberties.

19. Instead of young kids going to Uni and Tafe like nursing put them back to train in the hospitals and let them learn skills from real people in the work force and be paid for it.

20. Stop bringing in foreigners to take Australian jobs to bring down wages, drive up prices of rents, change the culture of the country for more taxes and votes for politicians again this is political treason.

21. Stop the monopoly of Woollies and Coles by cutting down their hours and make them pay big taxes.

22. Cut ties with international organisations like World Trade Organisations, IMF United Nations as these are all unconstitutional and abolish appointed councils who pose as government but are lobby groups such as Property Council of Australia and many more. The people of the Australia must have their say and the real experts are the people living in the areas not international lobby groups who are like vultures who push what they want to sell.

23. Banning politicians who represent groups who have political agendas such as the New World Order such as the Fabians Socialist, Emily's List who pose as working labor principles but implement socialist or Marxist policies.

24. The Media Monopoly has to be broken up and held accountable for their lies and propaganda and Australians not foreign elites must own the media and it should reflect our culture and values not Internationalists like Murdoch, Rothschild or Rockefeller.

In conclusion it the State and Federal Governments who have destroyed our country with their globalisation program that is about destroying our sovereignty and industries and what has happened in to CWNSW is no different to all of Australia, the policies have been forced upon Australians by dictators and are the problem.

It can only be solved by an honest government that serves the people and have loyalty to Australia. It is time for governments to reverse what they have done and clean out all the socialists and do the job of obeying the constitution. This will then flow onto every part of Australia will be regenerated not only Central West NSW.

I would be happy to appear before the committee to give evidence to the committee about t his serious problem Australia has the socialists have committed Australia to.

Julie Head
