The Honourable  
Minister for  
Parliament House  
Sydney NSW 2000

Dear Minister,

As a tax paying Australian citizen I am deeply concerned with Coal Seam Gas exploration in all areas of Australia. The many proven risks associated with this type of so called clean alternative energy, including risks of gas leakage, risks to our health and our children's health and damage to our so valuable underground water, make CSG exploration completely unacceptable and it should not be allowed in this country. Greedy corporations do not have the best interest of the Australian citizens at heart. We elect a government to look after the best interests of this great land we call Australia and to protect it for future generations to come.

We live in a democracy, but our democratic rights are not being protected or exercised. How can the government even consider such proposals to go ahead? Do the right thing for your country and your citizens. Say no to CSG mining and have a complete moratorium on all stages of development of the CSG industry.

Yours sincerely
