INQUIRY INTO COAL SEAM GAS

Name: Mrs Cornelia Tischner-King

Date received: 27/08/2011

Dear Director of Parliament House.

I am deeply concerned and opposed to any Coal Seam Gas mining. In this current world situation where most of all problems have been caused by the greed of the corporate world, which led to exploitation of this planet supported by politicians. As a private citizen I honour the law and I hope that also a corporate company has to behold to this law, which means that native vegetation and water management laws have to be followed as everyone else has to. So must all chemicals used in coal seam gas drilling or tracking be assessed by chemical regulator for use before being approved by used, as every other citizen would have to. This current situation is morally inconceivable and every government agreeing person to coal seam gas fracking before proper investigation should be held responsible for the health of every Australian being suffering, by court.

There needs to be a full moratorium for all drilling, a sorrow investigation until all environmental, social and health impacts have been seen and resolved.

Sincerely

Cornelia
