>

I was under the impression that NSW was finally going to wake up to the fact that second hand smoke is harming people.

Yet I read the article about 25% opening allowing smoking. Come on. Get real about the issue. Follow the lead of most other states. You can't smoke in most public buildings. Why should you smoke in clubs and pubs?

Think about the workers in these places, as well as the patrons. How many are going to get ill or die as a result of your committee not taking the plunge and banning this filthy habit, and it really is a filthy habit if you look sensibly at it.

I for one do not want to suffer from your decisions.

Bite the bullet for everyone's benefit and welfare.

Let Labour become a great decision maker instead of a gutless team of whatever's.

I would appreciate if you could keep me informed as to your decisions and recommendations in the future.

Bill Vandenberg.
