THE TRANSPORT NEEDS OF SYDNEY'S NORTH-WEST SECTOR

Name: Mrs Laura Jilka

Date received: 16/10/2008

1. Lengthening of Bus Lane between M2 and Lane Cove is required to stop Buses being stuck on the M2 in excess traffic, especially in the morning peak.
2. Provision for parking in high use bus stop areas. Castle Hill and Baulkham stops have minimal parking available for residents which need to drive to catch the City Bus. The ability to park may encourage greater patronage.
3. Increased services from the City to Castle Hill (610) on the afternoons of the weekend. They are always full.
4. Ability to use Government Student Card on all trips on Hillsbus. Currently, have to obtain a separate card that takes weeks meaning no discount during that period. You are also unable to get discount on weekends (even though you maybe using the library at Uni). The Government sticker/logo on the student card is available 24/7 on the ferries, trains and buses!
