INQUIRY INTO COAL SEAM GAS

Name: Mr Ben Adams

Date received: 6/09/2011

For the attention of the Legislative Council General Purpose Standing Committee no. 5

I require from the government:

1) A full moratorium on all forms of coal seam gas drilling until the environmental, social and health impacts have been rigorously and independently assessed.

The decision to keep our waterways clean for swimming, fishing, farming and drinking is on your shoulders.

Your decision will affect every single Australian for generations.
