

INQUIRY INTO SAME SEX MARRIAGE LAW IN NSW

Name: Name suppressed

Date received: 15/02/2013

Partially Confidential

The current wave of manipulation of perception towards supposed "equality" in marriage relationships is seeing a frenzy of nations bowing to legalisation of same-gender "marriage" in the vane and hazardous notion that they are obliged to be "modern" in thinking and attitude even if it means jumping into quick-sand. If our Australian leaders submit to manipulation of the emotive semantics by lobbies promoting same-gender "marriage, then leadership responsibility might at least postpone enthusiasm for "keeping up appearances" until the rest of the world can observe the consequences of such radical social experiments where they have already been adopted. Remember that old adage: "Look before you leap."
