INQUIRY INTO SAME SEX MARRIAGE LAW IN NSW

Name: Name suppressed

Date received: 17/02/2013

Partially Confidential

After a Federal decision has been made already on behalf of the Australian Nation, why is the NSW Parliament sticking their noses where it doesn't belong in trying to appease a minority group who are trying to enlighten what the majority's requirements are, trying to change the foundations of our society that has existed longer than what Parliament has itself. If Parliament want to waste tax payers money with nothing better to do with their time, then I suggest put it to the voting public once and for all outlining fully what it would mean if the definition of marriage was to be changed (pros & cons) and let the voting public know which politicians are for it or against it with the opportunity of those politicians to be voted in or out.
