Summary

I object to public exclusion from government intent to sell off the snowy river scheme to private interests as reported by the Rev Hon Dr Gordon Moyse AC MLC in an e-mail communication this weekend.

Firstly that the matter was concealed raises a lack of transparency in government process. Secondly this scheme has been funded by the Australian public with hard earned taxes. It has historical significance and should be a National heritage for future generations.

Selling it to private interests would eliminate these valuable benefits and place profits into the pockets of people who did not pay or work for it's creation.
