## workerscompinquiry - Why are injured workers Discriminated against

---

Could you please explain why injured workers are not able to  
Be represented at the inquiry?

This is a travesty of parliament, and justice, in NSW!

The excesses and costs soaring are because of the case management and the  
Unregulated excesses that are in the system not the injured workers! Talk to  
Any legal person, they know the issues.

Please remember that prior to injury, injured workers were  
Productive members of society, not some Dole Bludger sitting on a  
Beach. The injured worker was contributing to the State and the Commonwealth.

Injured workers are the joke of all media and by not being able to  
Be represented in this inquiry your group are reinforcing this misconception.

Last night I heard that one proposal was to exclude all without 30% WPI  
I have 28% with a cervical spinal injury that makes every minute of my  
Life a painful experience. I am 61 and I contributed to this State's economy  
From the age of 14.5 years and now I am being treated like a leper. Why!!

I trust that your committee does not discriminate against injured people.

Yours in hope of justice

Norm Dezius
