INQUIRY INTO COAL SEAM GAS

Name: Miss Melanie Moore

Date received: 14/09/2011

Miss Melanie Moore

Dear Committee Members,

RE: NSW Inquiry into Coal Seam Gas

The purpose of this letter is to inform you that I, Melanie Moore am strongly opposed to the Camden Gas Project. I am horrified that the residents of Campbelltown and Camden must convey their concerns and right for clean air and water before any action is taken to stop such as outrageous act of environmental destruction. The methods of extraction of unconventional gas uses numerous chemicals which possess a high risk to our health and quality of life as the two main resources critical for survival is at risk of chemical contamination. How can such a health risk be allowed in today's society? If the negative events that have occurred internationally due to Coal Seam Gas mining is anything to go by, I implore you to please make a conscious decision that the Campbelltown community can be thankful for!

Kind regards,
