## **INQUIRY INTO COAL SEAM GAS**

**Name:** Mr Brad Christensen

**Date received:** 6/09/2011

---

I totally am against CSG exploration in the Manning Valley and any other region that has prime agriculture land and creek and river systems that will be affected by CSG mining. This is all for a short term gain that is going to have a detrimental effect on our farming land and river systems for our future generations of farmers. I am not against mining at all but where we do mine has to be thoroughly investigated before any mining goes ahead at all. And it can not and must not interfere with any waterway what so ever!!!!!! .We must preserve and nurture our great farming land now before its too late.
