The Hon Rick Colless MLC
Committee Chairman
Standing Committee on State Development
Legislative Council.

Inquiry into the adequacy of water storages in N.S.W.

Dear Sir,

- (1) We have driest continent, so we need to save water for dry times.
- (2) Our population has increased, but we haven't increased storage of water.
- (3) Increased urban use will decrease water for agriculture.
- (4) Environmental demands have increased so they will have less water for agriculture.
- (5) We need more food from agriculture to feed increased population.
- (6) The natural rain fall filling of Lake Coolah near Narrandera this year, shows the scope of how we could dramatically improve water storage.
